Metrology Labs

Precision Environments offers lab recertification services for your metrology lab. Our process consists of testing the lab environment using the original testing protocol including:

- Test Sensor Locations
- Owner Acceptance Criteria
- Duration of the Test
- Relevant Testing Information

Since the original protocol is the basis for accepting the lab environment after initial construction, the original tests become the base line for future tests. Recertification tests are compared to baseline tests to determine lab environment compliance. We recommend annual recertification tests.

Precision Environments' Metrology Certification includes these ISO/IEC 17025:2017 Accredited Environmental Surveys:

- Temperature
- Humidity
- Illuminance
- Pressure
- Air Flow
- Sound Level

PREVENTATIVE MAINTENANCE

Precision Environments provides Preventive Maintenance Services on the following types of equipment:

- Water Cooled Condensing Units
- Air Cooled Condensing Units
- Water Cooled Chillers
- Air Cooled Chillers
- Air Handling Units
- Humidifiers
- Ionizers
- Schneider Electric DDC Control Systems
- PLC Control Systems
- Reheat Coils
- RO/DI Water Conditioners
- Water Softeners
